

## **Job Title: Metal Building Construction Worker**

### **Job Summary:**

A Metal Building Construction Worker is responsible for assembling and erecting pre-engineered metal buildings used in commercial, industrial, and agricultural settings. This role involves working with structural steel, metal panels, insulation, and other building components, often in outdoor environments and at heights.

### **Key Responsibilities:**

- Assemble and install structural steel frames, wall panels, and roofing systems.
- Read and interpret blueprints, construction drawings, and manufacturer instructions.
- Use hand and power tools to cut, fit, and secure metal components.
- Install insulation, doors, windows, and trim as required.
- Operate equipment such as forklifts, scissor lifts, and cranes safely.
- Follow all safety procedures and wear the required personal protective equipment (PPE).
- Work as part of a team to complete projects on time and to specification.
- Maintain a clean and organized job site.

### **Qualifications:**

- High school diploma or GED preferred.
- Experience in construction or metal building assembly is a plus.
- Ability to read construction drawings and use measuring tools.
- Comfortable working at heights and in various weather conditions.
- Strong work ethic, reliability, and teamwork skills.

### **Physical Requirements:**

- Ability to lift and carry up to 75 lbs.
- Frequent standing, bending, climbing, and kneeling.
- Ability to work outdoors in varying weather conditions and at elevated heights.
