

## **Job Title: Welder**

### **Job Summary:**

A Welder is responsible for joining metal parts using various welding techniques to fabricate or repair structures and equipment. This role requires precision, attention to detail, and adherence to safety standards in industrial, construction, or manufacturing environments.

### **Key Responsibilities:**

- Read and interpret measurements.
- Set up and operate welding equipment (MIG, TIG, Stick, or Arc welding).
- Weld components in flat, vertical, or overhead positions.
- Inspect and test welds to ensure structural soundness and quality.
- Maintain tools and equipment in good working condition.
- Follow safety procedures and wear appropriate protective gear.
- Collaborate with team members and supervisors to meet project deadlines.

### **Qualifications:**

- High school diploma or GED; vocational training or welding certification preferred.
- Proven experience as a welder in a relevant industry.
- Knowledge of welding techniques, tools, and safety practices.
- Ability to read technical documents and a measuring tape.
- Strong hand-eye coordination and physical stamina.

### **Physical Requirements:**

- Ability to lift heavy materials (up to 50 lbs).
  - Standing, bending, and working in confined spaces for extended periods.
  - Tolerance for heat, noise, and exposure to welding fumes.
-
